All text must be within the 'Safe Zone'

Printer Pairs Explained

The simplest way to work out printers pairs is to make a mock up of your intended booklet using blank paper and write the numbers on the pages.

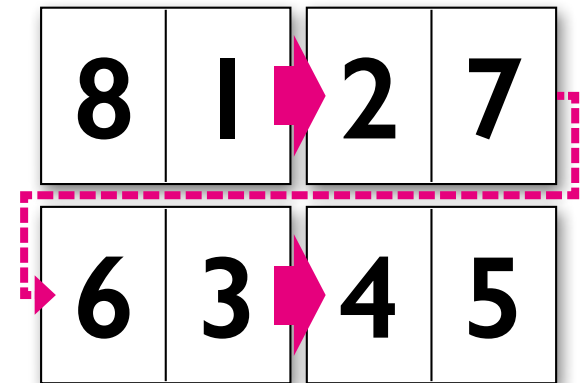

A four page booklet is one peice of paper folded in half, the outside pages – when viewed as a flat sheet – would have page 4 on the left and page 1 on the right as below, turn the paper over and you will see pages 2 and 3. Page 2 will be on the left and page 3 on the right, these are your centre pages.

4 Page Double-Sided Booklet laid out as Printers Pairs.

Below is an 8 page booklet laid out as printers pairs. You can work out bigger booklets eg. 12 page, 16 page, 20 page etc. by simply doing as we suggest and make one up with blank paper and write the page numbers on, lay the sheets flat to see your printers pairs.

8 Page Double-Sided Booklet laid out as Printers Pairs.

For information on printing a booklet from InDesign please check out Adobe Help:
